# 1. Document Revision History

Version	Date	Author	Description of changes / remarks
1.0	17/03/2026	eHealth platform	Major Release R202261 (28/04/2026)

## 2. Introduction

The objective of this document is to list changes, modifications, decommissions, bug corrections, which are part of this major release **R20261 beginning the 21/04/2026 and ending the 28/04/2026** following canary release method.(\*)

(\*) more explication of this method via those links:

FR: <https://www.ehealth.fgov.be/ehealthplatform/fr/service-releases-management>

NL: <https://www.ehealth.fgov.be/ehealthplatform/nl/service-releases-management>

It covers:

- New or modified functionalities to eHealth web services and web applications
- New utilities, libraries, connectors to facilitate the call to the eHealth web services (as for the end to end encryption library)
- Technical specifications and requirements (as for the network specification, system settings, minimum and compatible browser versions, patch levels, ...)
- New global solutions based on the combination of several eHealth components
- New Authentic Sources, semantics and syntactic standards
- New Value Added Services that should be released by partners with the official partner's production date (POC) and the eHealth production date
- New procedures to be applied

If applicable, this document specifies:

- The major deliverables (components, cookbooks, forms, user guides)
- The backward compatibility (which version remains valid)
- Point of contact

For more details: see section 3 of this document and at

FR: <https://www.ehealth.fgov.be/ehealthplatform/fr/service-releases-management>

NL: <https://www.ehealth.fgov.be/ehealthplatform/nl/service-releases-management>

## 3. Main new functionalities and minor changes

### 3.1 CHIV Consultation Pharmacists

This service allows a pharmacist with a therapeutic link to retrieve (consult) what reimbursement agreements have been granted for chapter 4 medicine for a particular patient. This service :

- allows the extended consultation : a specific paragraph or the complete view (similar to a physician)
- requires a therlink verification
- is only open to pharmacists

### 3.2 Opt-out

The new "Opt-out" basic eHealth service serves two purposes:

1) It provides each Belgian citizen with the possibility to register their decision to opt out of the automatic pre-referencing of their personal medical data by the hospitals and the vaults to the 4 hubs (CoZo, VZN-KUL, RSW and RSB). In case the opt-out is registered, no more data is pre-referenced to the hubs and no health care provider or institution will be able to consult the citizen's data via the eHealth ecosystem.

2) It provides each Belgian citizen with the possibility to register their decision to opt out of the anonymized use of their personal data for secondary use purposes (statistics, studies) in the context of the EHDS. In case the opt-out is registered, no more data of the citizen will be used for secondary use.

### 3.3 Evolutionary maintenance and corrections

- Cobrha +
  - Evolutive maintenance
  - No impact foreseen for external partners/package providers
- Cobrha + DB
  - Evolutive maintenance
  - No impact foreseen for external partners/package providers
- IAM Connect
  - Evolutive maintenance
  - No impact foreseen for external partners/package providers
- Keycloak DB
  - Evolutive maintenance
  - No impact foreseen for external partners/package providers

- Pseudo
  - Evolutive maintenance
  - No impact foreseen for external partners/package providers
- IAM
  - Evolutive maintenance
  - No impact foreseen for external partners/package providers
- TRIO
  - Evolutive maintenance
  - No impact foreseen for external partners/package providers
- TimeStamping
  - Evolutive maintenance
  - No impact foreseen for external partners/package providers
- Cobrha
  - Evolutive maintenance
  - No impact foreseen for external partners/package providers
