1. Document Revision History

Version	Date	Author	Description of changes / remarks
1.0	25/08/2026	eHealth platform	Major Release R20262 (20/10/2026)

2. Introduction

The objective of this document is to list changes, modifications, decommissions, bug corrections, which are part of this major release **R20262 beginning the 13/10/2026 and ending the 20/10/2026** following canary release method.(*)

(*) more explication of this method via those links:

FR: <https://www.ehealth.fgov.be/ehealthplatform/fr/service-releases-management>

NL: <https://www.ehealth.fgov.be/ehealthplatform/nl/service-releases-management>

It covers:

- New or modified functionalities to eHealth web services and web applications
- New utilities, libraries, connectors to facilitate the call to the eHealth web services (as for the end to end encryption library)
- Technical specifications and requirements (as for the network specification, system settings, minimum and compatible browser versions, patch levels, ...)
- New global solutions based on the combination of several eHealth components
- New Authentic Sources, semantics and syntactic standards
- New Value Added Services that should be released by partners with the official partner's production date (POC) and the eHealth production date
- New procedures to be applied

If applicable, this document specifies:

- The major deliverables (components, cookbooks, forms, user guides)
- The backward compatibility (which version remains valid)
- Point of contact

For more details: see section 3 of this document and at

FR: <https://www.ehealth.fgov.be/ehealthplatform/fr/service-releases-management>

NL: <https://www.ehealth.fgov.be/ehealthplatform/nl/service-releases-management>

3. Main new functionalities and minor changes

3.1 Vaccinnet: Blocking inactive RIZIV/INAMI organizations

To access Vaccinnet as a RIZIV/INAMI organization, the RIZIV/INAMI organization must have an ACTIVE nihii_status.

3.2 Service List

Policy information for SOAP services and REST APIs is now available in Service List v3. Changes in this version include:

- all eHealth SOAP and REST endpoints;
- specification of the policies applicable to each eHealth endpoint;
- update of the ID attributes for all existing endpoints to a more generic format.

For more information, please refer to the:

- eHealth Business Continuity Plan | Platform eHealth (FR)
- or eHealth Business Continuity Plan | eHealth-platform (NL)

3.3 Creation of Sadmi v4

A new version of the SADMI SOAP service is introduced: /Sadmi/v4.

This version updates the SADMI web service contract in the context of the EUDAMED integration. The request and response structures have been adapted by adding, removing or renaming several fields in order to better align the service with the data available from EUDAMED.

This is a technical / API contract update. No impact is foreseen for existing /v3 integrations as long as /v3 remains available. Clients wishing to use the EUDAMED-aligned contract must migrate explicitly to /Sadmi/v4.

For more information, please refer to the:

- ABIMD - Authentieke Bron van Implanterbare Medische Hulpmiddelen | eHealth-platform (NL)
- or SADMI - Source Authentique des Dispositifs Médicaux Implantables | Platform eHealth (FR)

3.4 Decommissioning of Sadmi v2

Decommissioning of Sadmi v2. Clients using Sadmi should use a supported version: /Sadmi/v3 or /Sadmi/v4.

3.5 eCounter – MyCareNet New Service

The synchronous “eCounter” service of MyCareNet offers authorized institutions and healthcare providers the ability to consult the history of services subject to a consumption limit for a beneficiary. This functionality ensures proper billing and appropriate delivery of these services and products.

For more information, please refer to the:

- MyCareNet - eCounter | eHealth-platform (NL)
- or MyCareNet - eCounter | Platform eHealth (FR)

3.6 HCO Number for CBE Enterprises

This change offers additional possibilities for organizations that only have a CBE (Crossroads Bank for Enterprises) type of certificate, but have different types of care related organizations using this certificate. If these organizations request an IAM Connect Client for a specific kind of organization with different access rights in the eHealth EcoSystem, they can add the HCO (Health Care Organization) number and the HCO-authority (the federal, regional or other authority, responsible for dispensing the HCO-number) to their IAM Connect Client in order to provide a more fine grained identification.

3.7 Evolutionary maintenance and corrections

- CoBRHA+
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- DAAS
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- IAM AA
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- IAM eXchange
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- IAM IDP
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- IAM PDP
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- IAM STS
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Therlink
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- IAM Connect
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Link
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Consent
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Directory
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- IDSupport
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Pseudo
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- UHMEP API
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers

3.8 Currently Supported Browsers (minimal version)

You can find the list of supported browsers at the following links:

Comment accéder aux applications ? | eSanté

+ Mon navigateur est-il validé ?

Hoe toegang krijgen tot applicaties? | eGezondheid

+ Is mijn browser goedgekeurd ?

4. Related communication

You can find all the communications that were sent in preparation for this major release. **Please review them again.**

The following news items are available via the:

- Nieuws | eHealth-platform
- Actualités | Platform eHealth
 - Change certificates to ECC in acceptance on R20262
 - Timestamping - New Certificates in Production
 - Replacement Root CA Harica of SSL certificaten for *.ehealth.fgov.be

5. Known Issues

At this stage, there are no known issues.

6. Support

Issues in Production

Availability: Monday until Friday from 8 am until 6 pm **for end-users as well as partners** for issues with applications or services in production.

- By mail : [**support@ehealth.fgov.be**](mailto:support@ehealth.fgov.be)
- By phone : 02 788 51 55
- By web form :
 - NL: [**https://www.ehealth.fgov.be/ehealthplatform/nl/contact**](https://www.ehealth.fgov.be/ehealthplatform/nl/contact)
 - FR: [**https://www.ehealth.fgov.be/ehealthplatform/fr/contact**](https://www.ehealth.fgov.be/ehealthplatform/fr/contact)

Issues in Acceptation/Integration

For issues with applications that are still in acceptance or integration phase, this team can be contacted **by partners only**.

Availability: Monday till Friday from 9am till 4:30pm

Mail to [**integration-support@ehealth.fgov.be**](mailto:integration-support@ehealth.fgov.be)
