1. Document Revision History

Version	Date	Author	Description of changes / remarks
1.0	11/03/2025	eHealth platform	Major Release R20251(15/04/2025)

2. Introduction

The objective of this document is to list changes, modifications, decommissions, bug corrections, which are part of this major release **R20251 beginning the 8th April and ending the 15^h April 2025** following canary release method.(*)

(*) more explication of this method via those links:

FR: <https://www.ehealth.fgov.be/ehealthplatform/fr/service-releases-management>

NL: <https://www.ehealth.fgov.be/ehealthplatform/nl/service-releases-management>

It covers:

- New or modified functionalities to eHealth web services and web applications
- New utilities, libraries, connectors to facilitate the call to the eHealth web services (as for the end to end encryption library)
- Technical specifications and requirements (as for the network specification, system settings, minimum and compatible browser versions, patch levels, ...)
- New global solutions based on the combination of several eHealth components;
- New Authentic Sources, semantics and syntactic standards
- New Value Added Services that should be released by partners with the official partner's production date (POC) and the eHealth production date
- New procedures to be applied

If applicable, this document specifies:

- The major deliverables (components, cookbooks, forms, user guides)
- The backward compatibility (which version remains valid)
- Point of contact

For more details: see section 3 of this document and at

<https://www.ehealth.fgov.be/ehealthplatform/fr/service-releases-management> (French version)

<https://www.ehealth.fgov.be/ehealthplatform/nl/service-releases-management> (Dutch version)

3. Main new functionalities and minor changes

3.1 Prescription Search Support FHIR

Software providers can call the API to request advice based on international guidelines. The generated advice is not saved. There is only minimal storage for monitoring and statistical reasons (with only logging of indication and timestamp) in the PSS back-end platform.

3.2 WS Access Matrix

This new service is an addition to the existing Metahub services.
The goal of the service is to:

- Store the standard access Matrix
- Store the patient choices related to his health data access, should he wishes to modify the standard access matrix
- Enable consultation of the standard matrix and patient choices by:
 - the patient (via patient portals)
 - the patient health data holders such as Vaults, Hubs, RECIP-e that need to verify patient choices in terms of data sharing

3.3 BelRai

The BelRAI 2.0 API allows healthcare organizations and individual care providers to register and consult BelRAI assessments. Software providers are provided with a number of methods via the API to facilitate integration with the central BelRAI platform

3.4 Pseudo Rest Service

The information from and for the patient regarding a medical prescription is also pseudonymized by the Uhmep application, in addition to the patient's SSIN. This information, contained in a text field, must be readable by the patient and this can be achieved using the Identify operation.

3.5 Evolutionary maintenance and corrections

- IAM
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Therapeutic link
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Metahub Batch
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers

- Cobhra + DB
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Cobhra +
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Software Register DB
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- Recip-e Prescriber and executor
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers
- IAM Connect
 - Evolutive maintenance
 - See external related communication
- eH2eBox
 - Evolutive maintenance
 - No impact foreseen for external partners/package providers

3.6 Currently Supported Browsers (minimal version)

You will find the supported browsers try these links:

Comment accéder aux applications ? | eSanté

+ Mon navigateur est il validé ?

Hoe toegang krijgen tot applicaties? | eGezondheid

+ Is mijn browser goedgekeurd ?
