 - 1.1 Document history..... 2
 - 1.2 Goal of the document..... 2
- 2. IdentifyPerson 3
- 3. PhoneticSearch 3
- 4. PersonHistory 3

1. Document management

1.1 Document history

Version	Date	Author	Description of changes / remarks
	04/11/2016	Ehealth	Initial version

1.2 Goal of the document

This document describes the list of changes in the request and response of consultrn web services deployed on 23/10/2016.

2. IdentifyPerson

Xml output:

- 1) The values of the xml elements may be formatted in uppercase or in lowercase.
- 2) The attribute *ModificationDate* will be no more returned for the following elements:

Element
Person[@ModificationDate]
Birth[@ModificationDate]
Decease [@ModificationDate]

- 3) Bug has been fixed concerning first name and middle name:

In the previous version, the first name and middle name was in the same element *Name/first*.
In the new version, the element *Name/first* contains only the first name and *Name/Middle* contains only the middle name.

- 4) Bug has been fixed concerning description of postal code for a municipality.

In the previous version, the description of postal code was in the element *Localisation/Description*
In the new version, the description of postal code is in the element *Municipality Municipality/Description*.

3. PhoneticSearch

Xml input:

When we use a tolerance, the maximum number of results (element: *maximum*) is limited to 50 instead of 80.

Xml output:

Same changes as for identifyPerson

4. PersonHistory

Xml output:

Same changes as for identifyPerson
